

Part 2 – Creadify UI/UX Design System

1. Design Philosophy

Create a premium, modern, trustworthy agency experience. Prioritize clarity, whitespace, consistency, accessibility, and conversion-focused layouts over visual clutter.

2. Brand Colors

Primary: Navy (#0A355B). Accent: Orange (#FF7A1A). Secondary: Cyan (#46D3F3). Neutral palette: White, Light Gray (#F8FAFC), Border Gray (#E5E7EB), Text Gray (#475569).

3. Typography

Headings: Manrope or Sora. Body: Inter. H1: 64px, H2: 48px, H3: 36px, H4: 28px, Body: 18px, Small: 16px. Use generous line height and bold headings.

4. 8px Spacing System

Use spacing values of 8, 16, 24, 32, 48, 64, 80, 96, and 128px. Sections should have 96–128px vertical padding.

5. Layout Grid

12-column desktop grid, max container width 1280–1440px, centered layout. Maintain consistent gutters and alignment.

6. Buttons

Primary: Orange filled. Secondary: Navy outline. Hover: slight lift, shadow, and 150–250ms transition. Rounded corners (12–16px).

7. Cards

Rounded 20–24px corners, subtle shadows, generous padding, icon at top, title, description, CTA. Hover with elevation and border glow.

8. Forms

Large inputs (56px height), floating labels optional, clear validation, inline error states, success confirmation, and high-contrast submit button.

9. Icons & Illustrations

Use consistent line icons with rounded corners. Illustrations should reinforce marketing, analytics, and business growth themes.

10. Motion System

Fade-up on scroll, staggered card reveals, animated counters, floating dashboard widgets, smooth page scrolling, and restrained micro-interactions.

11. Accessibility

Maintain AA contrast, visible focus states, keyboard navigation, semantic HTML, descriptive button labels, and alt text for graphics.

12. UI Components

Reusable components: Header, Hero, Service Card, Industry Card, Statistic Counter, Testimonial Card, FAQ Accordion, Contact Form, CTA Banner, Footer.

13. Design Rules

Keep a consistent border radius, icon size, spacing rhythm, and typography scale. Avoid overcrowding; every section should have one primary message and one primary CTA.
